COMMENTS OF ARRIS GROUP, INC.

ARRIS Group, Inc. ("ARRIS") welcomes the opportunity to express its support for the proposed transaction involving Charter Communications, Inc. ("Charter"), Time Warner Cable Inc., and Advance/Newhouse Partnership. This transaction will produce economies of scale and scope and other efficiencies that will benefit consumers with technological advancements in broadband Internet, video, and related services.

Charter has been an industry-leading innovator in broadband Internet and video services. With respect to broadband Internet, Charter's lowest speed tier sold is 60 Mbps, which is higher than many other providers' lowest speed tier, and which Charter plans to expand throughout the combined company's footprint. This type of investment will help drive greater broadband deployment, meet consumers' demands for faster Internet service, and spur demand for new Internet-based applications and content. Consumers will benefit as Charter expands higher-speed Internet options – especially at the lowest tier level – to a greater number of consumers.

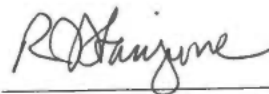

The transaction will also lead to a faster rollout of, and more innovation with respect to, advanced video technology. Charter's system is currently 99% all-digital, and Charter plans to invest in an all-digital system in Time Warner Cable's and Bright House Network's service

areas. This too would benefit consumers, as it would allow Charter to repurpose reclaimed analog bandwidth for more HD channels, more VOD offerings, and other advanced video services. The transaction will also allow Charter to deploy its cloud-based guide and related features across the combined service areas, making it easier for consumers to search for and discover video content and providing more consumers with the opportunity to access video content across multiple devices, in and outside their homes.

Finally, Charter's increased scale has the potential to benefit device manufacturers and other vendors by creating a new national platform to drive innovation in Internet and video technologies. ARRIS looks forward to having the opportunity to partner with the combined company on new solutions that will benefit the American consumer.

In sum, the transaction will help foster the next wave of innovation for more consumers, and ARRIS urges the Commission to approve it.

Respectfully submitted,
